

MONTHLY REPORT

NHA TRANG

FEBRUARY 1969

GENERAL

All activities have been routine for the month. The TET holidays plus the short month cut all totals considerably but not as bad as was expected.

Our only worthwhile report would be the closing of our large hostel and moving the crew members into the Nautique hotel. This will have a threefold effect, crew moral, financial savings and a better operations all the way around.

TRAFFIC

This department under Mr DUBOIS's direction and reorganization is providing the customer with much better service -

	<u>Feb</u>	<u>Jan</u>
A/C arrivals	476	740
A/C departures	465	751
RON	294	358
Pax handled	4657	4088
Cargo handled	616,182	613,962
Flt time Nha based A/C	857:22	1249:21
Block time " "	1030:19	1484:26

COMMUNICATIONS

This department has functioned well despite the constant equipment break down that has plagued us this month. Our Motorola remote station has been out of commission most of the month for one reason or the other.

SECURITY

Terror activity has picked up in town, also the base has been shelled twice, luckily nothing has fallen in the AAM area.

PERSONNEL

See SCN break down.

TECHNICAL SERVICES

The office building has been painted, which has improved the appearance of the area. A well was put down and water tank installed for the A/C washing area. We are very short on storage area for supply and move shops area, the lean to extension is badly needed.
